

October 26, 2020

The Honorable Lindsey Graham
Chairman
Committee on the Judiciary
United States Senate
Washington, D.C. 20510

The Honorable Dianne Feinstein
Ranking Member
Committee on the Judiciary
United States Senate
Washington, D.C. 20510

The Honorable Jerrold Nadler
Chairman
Committee on the Judiciary
U.S. House of Representatives
Washington, D.C. 20515

The Honorable Jim Jordan
Ranking Member
Committee on the Judiciary
U.S. House of Representatives
Washington, D.C. 20515

Dear Chairman Graham, Ranking Member Feinstein, Chairman Nadler, and Ranking Member Jordan:

The undersigned represent a diverse array of American innovators, ranging from universities and non-profit foundations, to individual inventors, to start-ups and small businesses, to manufacturing, technology, and life sciences companies. Together we represent thousands of organizations that employ millions of workers in the United States. We all believe that the future of the U.S. economy, including domestic job growth and our competitive advantage in the global economy, depends on a strong patent system that incentivizes innovators to invent and protects their inventions from unfair theft by others.

We write to express our support for the important improvements the U.S. Patent and Trademark Office (USPTO) has implemented over the past several years under the leadership of Director Andrei Iancu. In this short period, Director Iancu has clearly changed the dialogue surrounding patents, defined the patent system by the brilliance of inventors, the excitement of invention, and the incredible benefits they bring to our economy and society as a whole. He continuously demonstrates commitment for restoring balance and confidence in the U.S. patent system.

Of particular importance, the USPTO has made several critical changes to the operations of the Patent Trial and Appeal Board (PTAB) that addressed some—but not all—of the unintended consequences of the America Invents Act (AIA), injecting more predictability, reliability, and consistency into the patent system. Patent owners must have confidence in the reliability of their patents so that they will invest the significant resources required to develop their ideas into new products and technologies.

Many of the recent changes the USPTO has implemented were intended to harmonize the standards used in PTAB trials with those used in patent infringement trials in federal district courts. Given that Congress intended PTAB trials to be a cost-effective alternative to district

court litigation, and Director Iancu has the statutory authority, it made sense to ensure a consistent application of standards between proceedings in court and before the PTAB.

Perhaps the most important of these changes was adopting regulations to require PTAB to interpret issued patent claims according to their ordinary meaning as understood by a person of ordinary skill in the field covered by the patent. By adopting this so-called *Phillips* standard of claim construction used in federal court for use in PTAB proceedings, the USPTO provided much needed consistency in the interpretation of challenged patents. We also strongly support other recent changes, including updated briefing procedures, improved procedures for amending claims before PTAB, and appropriately assigning the burden of proof of invalidity on the patent challenger, all of which strengthen predictability of decisions by the USPTO and ensure that patent rights are more fairly issued and adjudicated.

We also understand from press reports that USPTO had been preparing to institute a proposed rulemaking concerning the factors PTAB panels can use to deny institution of a panel when there is parallel litigation in district court. While several large platform companies filed suit challenging the authority of the Director to exercise his discretion in this way, we think it clear that both the AIA itself and common sense support the authority of the USPTO director to set regulations for the exercise of discretionary authority to deny institution in these instances. We see basic unfairness to litigants who must otherwise litigate the same issues more than once, and little need to waste scarce government resources on duplicative actions proceeding in parallel before the PTAB and the district court. We strongly support a USPTO rulemaking to confirm this approach.

Recent letters to Congress opposing the USPTO rulemaking incorrectly suggest that it would upset congressional intent in passing the AIA by foreclosing an additional proceeding to challenge patents. Congress was clear that it intended inter partes review (IPR) to provide a cheaper and faster *alternative* – not an *addition* – to district court litigation. If a district court case is likely to conclude near the same time as an IPR proceeding concerning the same dispute, the IPR proceeding would not be a faster alternative, and instituting an IPR proceeding would only add to the cost of resolving the dispute, so it would also not be cheaper. Logically, then, when a dispute can be more efficiently resolved by a district court, or an ongoing litigation is likely to resolve the dispute in a reasonable period of time, the Director was given the discretion not to institute an IPR proceeding.

The IPR proceeding was structured to provide a quicker resolution and on a more limited set of issues than might be brought in litigation. As a result, parties in the proceeding were provided a more limited set of tools than available in District Court to allow the USPTO to meet this congressional mandate. Congress clearly put the Director in the position to determine, for the efficiency of justice, which forum could resolve the issues best, then went further by making that decision non-appealable – lest those appeals undercut the speed and low cost of the new proceeding. Suggesting otherwise is not consistent with the congressional record. Moreover, the recent Supreme Court decisions in *Cuozzo v. Lee* and *Thryv v. Click-to-Call* both affirm the Director's broad discretion on instituting an IPR, a position at least one of the companies who signed the letters opposing the rulemaking supported in its own amicus brief to the Court.

Director Iancu has also brought a renewed commitment to much-needed administrative regularity at the USPTO and a real and commendable focus on ways to expand American innovation by tapping into the strength of our nation’s diversity and increasing the opportunities for all Americans to participate in innovation. He has also introduced innovative measures to help patent stakeholders during the COVID-19 crisis, including deferred fee payments for small and micro entities and extensions of time for certain statutory deadlines.

Under Director Iancu’s leadership, the USPTO has taken great strides toward restoring a predictable, reliable, and consistent patent system that protects inventors and promotes U.S. leadership in global innovation. We urge you to support these reforms, and look forward to working with you and your colleagues on the Judiciary Committees to further strengthen our patent system.

Solar Powered Light Assembly To Produce Light Of Varying Colors

Thomas Riederer, Inventor

Santa Barbara, CA

US 9,509,975

Methods For Acquiring, Storing, Transmitting And Displaying Stereoscopic Images

Walter Rinebold, Inventor

Addison, IL

US 6,968,513

On Line Localized Business Referral And Revenue Generation

Robert Rock, Inventor

Dania, FL

US 9,922,582

Wall Mounting Apparatus

David Rockwell, Inventor

Tampa, FL

US 10,515,527

Security Surveillance Device

John Rogitz, Inventor

San Diego, CA

US 7,400,288

Target Visualization System

Israel Rosario, Inventor

Fort Lauderdale, FL

US 9,333,821

Hitch Ball Mount

Charles Roscoe, Inventor

Holland, OH

US 6,460,677

Dual Ball Ramp Actuator For Locking Differential

Ari Rosenberg, Inventor

New York, NY

US 7,089,195

System And Method For The Presentation Of Ads

Fred Ruckel, Inventor

Gilboa, NY

US 10,701,898

Multi Functional Pet Enrichment System

Natasha Ruckel, Inventor

Gilboa, NY

US 10,334,824

Multi Functional Pet Enrichment System

Elliot Rudell, Inventor

Franklin, TN

US 7,594,349

Edge Animation Multiple Image Display Device

Dennis Ruffer, Inventor

Santa Clara, CA

US 4,373,186

And Matrix Method And Apparatus For Engine Analysis

Angadbir Salwan, Inventor

Potomac, MD

US 8,319,630

Air Cushioned Bag With Electro Mechanical Devices

Vincent Samudosky, Inventor

West Mifflin, PA

US 7,934,440

Powered Wrench

Glenn Sanders, Inventor

Pompton Plains, NJ

US 8,385,814

Virtual Multi Track Recording System

Irl Sanders Iii, Inventor

Van Nuys, CA
US 4,726,805
Tampon Applicator

Sami Sarrouh, Inventor

Westlake, OH
US 6,234,323
Header For A Sludge Removal System

Michael Satten, Inventor

Roslyn, NY
US 4,581,904
Toy Jewelry Item With Parts Movable To A Hidden Position

Michael F. Scalise, Inventor

Clarence, NY
US 10,587,073
Circuit Board Having a Feedthrough Wire Connector for Use in a Medical Device

Rodica Schileru, Inventor

San Jose, CA
US 10,096,342
Method And System For Segmenting Videos

Henry Script, Inventor

Buffalo, NY
US 6,215,396
Portable Motion Detector And Alarm System And Method

Steven Sedlmayr, Inventor

Idaho Falls, ID
US 5347644
Three-Dimensional Image Display Device And Systems And Methods For Implementation Thereof

Michael Seedman, Inventor

Highland Park, IL
US 7,010,298
Method And Apparatus For Detecting The Presence Of A Wireless Network

Dr. Alexey Serov, Inventor

Albuquerque, NM
US 9,812,719
Mixed-Reactant Fuel Cells With Selective Electrodes

Michael Shanahan, Inventor

Palisades, NY

US 10,049,566

Systems And Methods For Intravehicle Communication

Ramy Shenouda, Inventor

Willow Springs, IL

US 7,497,361

Process To Fracture Connecting Rods And The Like With Resonance Fatigue

Michael Shore, Inventor

Dallas, TX

US 8,632,392

Systems And Methods For Enabling Remote Wagering

Keith Shuman, Inventor

Maricopa, AZ

US 8,720,686

Lidded Container With Signaling Assembly

Gurvinder Singh, Inventor

Santa Clara, CA

US 9,258,698

Automatic Multimedia Upload For Publishing Data And Multimedia Content

Angad Singh, Inventor

Potomac, MD

APP 16/729,891

A Food Plate With Glass Holder And A Handle

Thomas Sinnott, Inventor

Omaha, NE

US D813,459

Hair Clipper Guide Attachment

Hal Slater, Inventor

San Diego, CA

US 7,827,814

Geothermal Water Heater

Roy Smith, Inventor

Sugar Land, TX

US 9,301,574

Internally Illuminated Light Diffusing Footwear

Mark A Sokalski, Inventor E
Carnegie, PA
US 10,119,463
Infinitely Variable Compression Ratio

Kenneth Stanwood, Inventor
Vista, CA
US 9,497,743
Methods And Systems For Transmission Of Multiple Modulated Signals Over Wireless Networks

Paul M. Stein, Ph.D., Inventor
Santa Ana, CA
US 9,555,251
Systems And Methods For Adjusting A Pacing Rate Based On Cardiac Pressure

Hugh Svendsen, Inventor
Durham, NC
US 8,874,554
Tunersphere

Matthew Szymczyk, Inventor
Manhattan Beach, CA
US 8,275,590
Virtual Dressing Rooms

Robert Taylor, Inventor
San Francisco, CA
US 9,877,436
Pivoting Hanging Baskets Assemblage Weighted For Gravity Closure

Tesia Thomas, Inventor
Mentor, OH
APP 16/070,637
Zipper System

Steven Thrasher, Inventor
Dallas, TX
US 7,797,299
Searching Data Storage Systems And Devices

Dr. Graham Timmins, Inventor
Albuquerque NM
US 10,591,491
Blood Biomarker For Early Blood Brain Barrier Disruption In Ischemic Stroke

Judy Tipton, Inventor

Pleasureville, KY

US 7,434,529

Live/Bait Well Ventilation Vent

Wesley Trammel, Inventor

Irving, TX

APP 62/720,676

Cycling Jersey Protector

Bao Tran, Inventor

Saratoga, NC

US 9,835,709

Permission Based Control Of Robots

Timothy Trunkle, Inventor

Charleston, SC

US 9,668,576

Cabot Hanging And Aligning System And Method

Jacek Tuszynski, Inventor

Elmwood Park, IL

APP 16/746,300

Binding Device For Paper And Other Items

Greg Utt, Inventor

Warrenton, MO

US 8,206,441

Corneal Endothelial Tissue Inserter

Frank Valderas, Inventor

El Dorado, IL

US D766,533

Sand Bag Filler

Stephen Vasko Jr., Inventor
